

# CHALLENGES OF COVERING THE ENVIRONMENT

## ESPP RESEARCH COLLOQUIA SERIES

### PANEL DISCUSSION:

Journalism practices, ethics, technology, and storytelling techniques are adapting to a changing world. The media landscape, global societies, politics, economies, cultures and matters of security are in flux all around us. Environmental journalism itself encompasses a large spectrum of issues and topics, both local and global. As new changes emerge, so do new challenges. Join us as we discuss -

**What are the underlying challenges that journalists must face, conquer and anticipate when they cover environmental news?**

Environmental Science  
and Policy Program  
at Michigan State University

Organized and moderated by: **Apoorva Joshi** (Journalism and ESPP)
